

This is the testing document of an Indian takeaway web application developed by Anuradha Mangalapalli and the testing is going to be done by Rajyalakshmi Chebrolu.

This is a simple web application to test. According to the test plan, all the test case are included in the following steps:

1. UAT results: User acceptance testing is a process of software development in which the application is tested in the real world by the tester or representative of the business. This process is done by analysing the product requirements and end-user testing.

List of UAT test cases:

- Test the Navbar links.
- Each page working status – Home page, menu page, yourorder page, Contactus page, Sign-up page.
- Responsive of each page.
- Every button function monitoring of each page.
- Login page functioning
- Sign in page functioning
- Cross browser testing.
- Load test on each page.

Usability test results:

Test Case ID	Test Case	Result	Time spent to test
101	Navbar Links Testing: Home page: Menu Page: Your order Page: Contactus Page: Sign-up Page:	Working efficiently – Pass Pass Loading the page nicely – Pass Pass Easy for user to Sign up – Pass.	20 minutes
102	Each Page Working Testing: Home page: Menu Page: Your order Page: Contactus Page: Sign-up Page:	Pass Pass Pass Pass Fail- There is no submit button on signup page. Submit button need to include.	25 Minutes

103	Responsiveness on each page: Home page: Menu Page: Your order Page: Contactus Page: Sign-up Page:	Home page responsiveness is working nicely on each device. Those are: iPhone 12 pro, iPad Mini and Desktop versions. FAIL FAIL FAIL FAIL	20 Minutes to test. 10 minutes to report.
104	Every button function monitoring of each page. Home page: Menu Page: Your order Page: Contactus Page: Sign-up Page:	Pass Pass Fail User cannot enter the card details. Pass Pass	10 minutes
105	Sign-up page Functioning:	Simple sign-up page and Easy to use – Pass. However, there is submit button.	5 minutes
106	Cross browser testing:	Cross browser testing on Chrome, Edge, and Firefox – Pass	15 minutes
107	Load test on each page:	Loading pages smoothly - Pass	10 minutes

Evidence of Each test result:

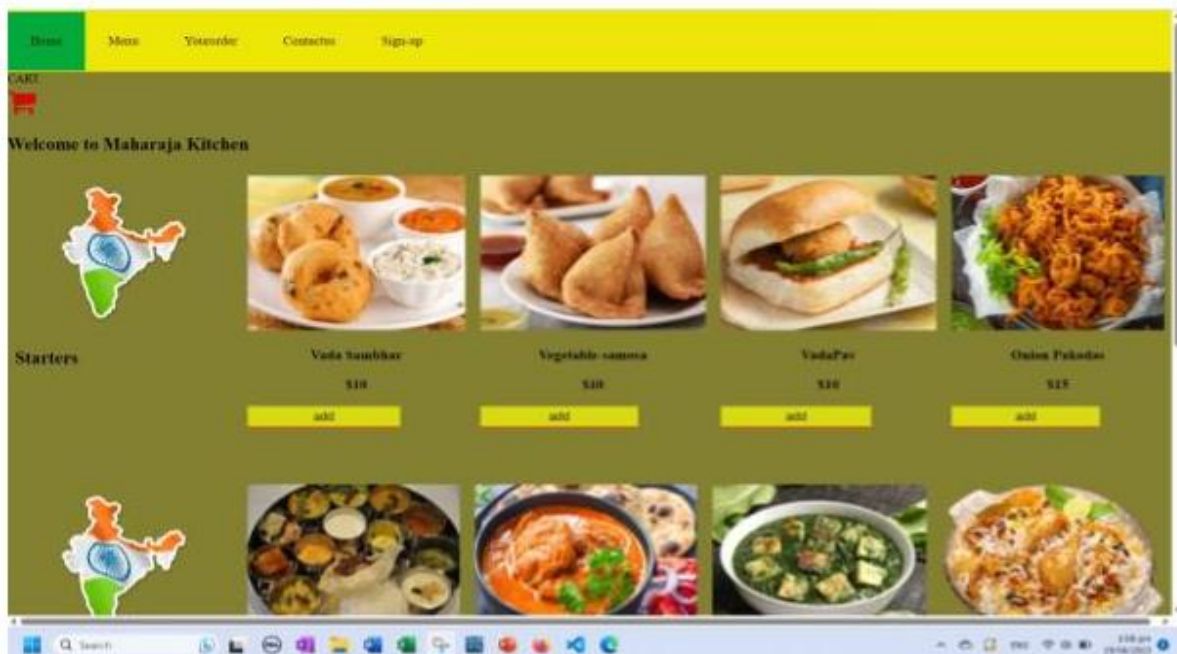

The below shown images are the evidence of testing.

1. Navbar Links Testing:

Home Page:

Menu Page:

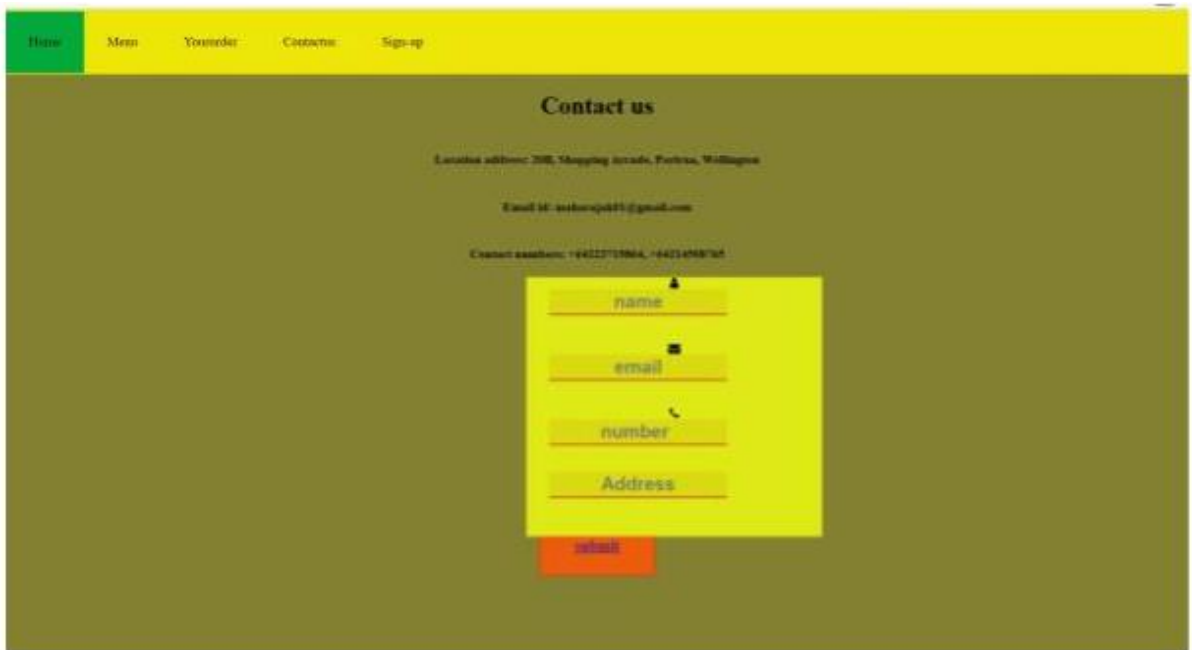

Yourorder page:

The screenshot shows a web page with a yellow header containing navigation links: Home, Menu, Yourorder, Contactus, and Sign-up. The main content area has a dark olive green background. The text 'Your order is ready' is displayed in white. Below it, the instruction 'Make your payment here' is followed by four input fields: 'Card holder name', 'Credit Card Number', 'Card Expiry' (with a placeholder '----/----/22'), and 'CCV'. A green 'Submit' button is positioned at the bottom left of the form area.

Contactus Page:

The screenshot shows a web page with a yellow header containing navigation links: Home, Menu, Yourorder, Contactus, and Sign-up. The main content area has a dark olive green background. The title 'Contact us' is centered at the top. Below the title, contact information is listed: 'Location address: 200, Shopping arcade, Portera, Wallagosa', 'Email ID: ashwaj441@gmail.com', and 'Contact numbers: +9422713864, +9421498764'. A white contact form is centered on the page, featuring four input fields labeled 'name', 'email', 'number', and 'Address'. Each field has a corresponding icon above it: a person for name, an envelope for email, a telephone for number, and a location pin for Address. A red 'submit' button is located at the bottom of the form.

Sign up Page:

ADD IMAGE HERE BFORE ADDING SUBMIT BUTTON

2. Each Page Working Testing:

ADD IMAGES HERE

CROSS BROWSER TESTING:

Cross browser testing is done with Microsoft Edge, Chrome, and Firefox. Web application works effectively on every browser.

Please add images here. TAKE IMAGE WITH BROWSER ON IT AND ADD

HIGH RISK INCIDENTS:

There are some incidents to report, including the list below:

1. Home page images are stretched when tested for responsive.
2. In Signup page, password is visible.
3. There is no submit button on the signup page.
4. In Yourorder page, credit card details are not working.
5. Responsiveness is not working for some pages.

These incidents are reported with developer on Tuesday 27th, so the changes are included in the web application. Then, the fixed code tested wisely, and the images are attached below:

Evidence of Regression testing:

1. Home page images are stretched when tested for responsive:

Add image here, the overlapping image which I don't have

2. Signup Page, Password:

Sign up page is fixed.

The screenshot displays a web application's 'SignUp' page. At the top, there is a yellow navigation bar with links: Home, Menu, Yourorder, Contacts, and Sign-up. The 'Home' link is highlighted in green. Below the navigation bar, the page has a dark olive green background. The title 'SignUp' is centered at the top of the form area. There are two input fields: 'Username' and 'Password', both with yellow borders. Below these fields is a green 'Submit' button. The 'Password' field appears to have a visible password character, which is the issue mentioned in the text.

3. **Submit button on the signup page:** Submit button is fixed.

The screenshot displays a web application interface. At the top, there is a yellow navigation bar with five links: Home, Menu, Your order, Cart items, and Sign up. The 'Home' link is highlighted in green. Below the navigation bar, the main content area has a dark olive green background. Centered in this area is the 'SignUp' form. The form consists of two text input fields: 'Username' and 'Password', both with yellow borders. Below these fields is a green 'Submit' button. The button is fixed in position, as indicated by the text above it.

4. **Responsiveness:**

All pages are responsive now. The images are attached below.

Please add all the images which you sent me, I am unable to copy those images.
